

Amanda R. Zeller Manley, OD, FCOVD

Developmental Optometrist

Dr. Zeller specializes in binocular vision disorders, brain injury vision rehabilitation, visuo-spatial disorders (vision-related learning problems) and special-needs vision care for children and adults. Her uniquely specialized approach to vision problems includes one vision therapist with one patient. Each treatment program is tailored to the patient's specific needs (as opposed to standard vision therapy curricula).

Along with associate Dr. Green, she has extensive experience treating children with autism spectrum disorders and other special problems. Their approach to visuo-cognitive therapy goes far beyond most vision therapy practices, being focused on the development of the visual-spatial basis for learning. Dr. Zeller enjoys spending time outside the office with her husband and baby son.

Board-Certified: College of Optometrists in Vision Development

OD: Nova Southeastern University, Ft. Lauderdale, FL
